	Urgent	Not Urgent
Important	Do - (Your MVP) ● Input: read homework entry as a String including the name of the homework and the deadline date ● Store input information in an ArrayList ● Sort the ArrayList of data by deadline dates after receiving input is finished ● Store the sorted list as a csv or txt file	Schedule - (For V2.0+) ● List importance level of each homework next to each entry ● Rewrite csv or txt file when changes are made ● Enable MVP to clear out completed homework when asked to ● Receive individual new entries for new homework assignments ● Print entire contents of list when prompted
Not Important	Delegate - (Use a library) ● Import java.util.ArrayList, not a standard array ● Possibly import library to help manage calendar dates (or maybe not)	Delete - (Cut it) ● Sorting by course ● Reminders of imminent deadlines ● Graphical UI ● Printing individual entries that are asked for ● Automatically clear out homework that is past due
